## Prologue

Research at an individual level is measurable. The clinicians' quality of research can be enhanced with the right people, the right mentoring, and the right monitoring. We at Ignobilis Terrain LLP, master this process. We can boast that we have mentors on board with more than three decades of cumulative research experience. The key is the identification of the right resources and nurturing them positively over a while. Generally, this process can be done at an individual/group level in 6-9 months.

**Program**

Research is all about asking questions. The ability has been lost systematically over prolonged periods of conventional methods of education. It is essential to regain this ability. The Whys, Whats, and the Hows, etc. **M<sup>2</sup>RP** program will ensure this ability is restored to a group of committed faculties
