Prologue

Research at an individual level is measurable. The clinicians' quality of research can be enhanced with the right people, the right mentoring, and the right monitoring. We at Ignobilis Terrain LLP, master this process. We can boast that we have mentors on board with more than three decades of cumulative research experience. The key is the identification of the right resources and nurturing them positively over a while. Generally, this process can be done at an individual/group level in 6-9 months.

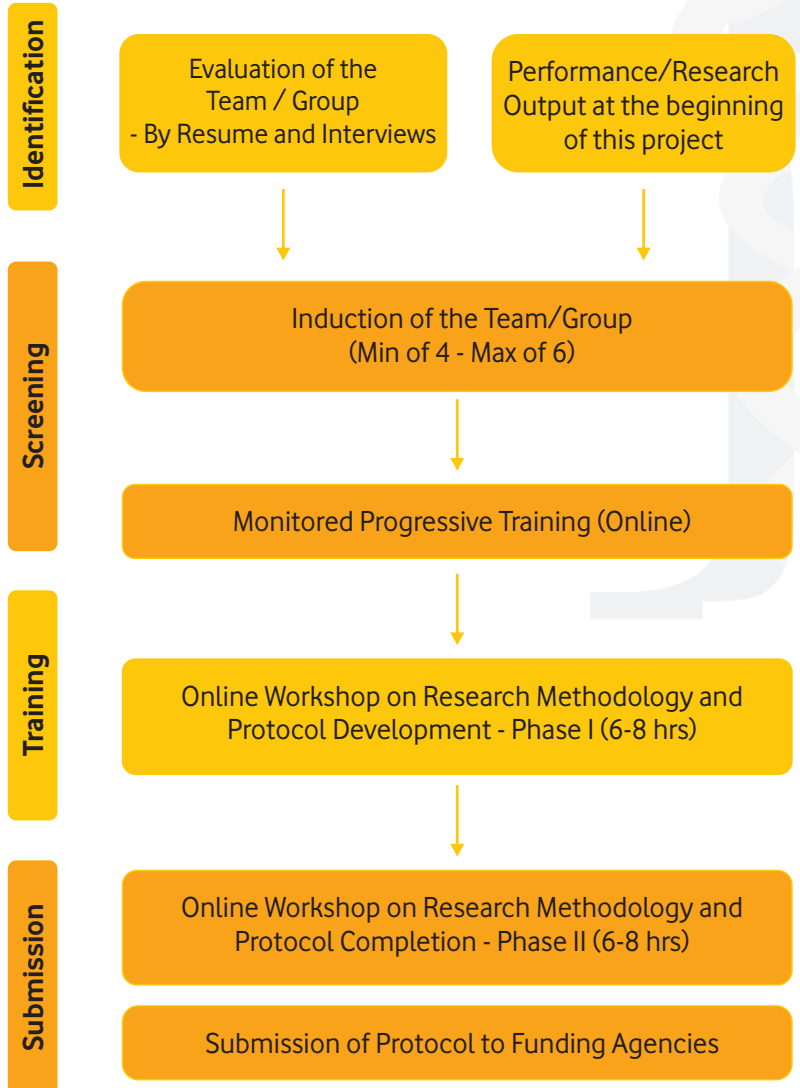

The Deliverables

- By the end of this **M²RP** program, the team/group would have submitted at least one project to the **external funding agency in the range of INR 20-80 lakhs per project per faculty/researcher.**
- By the end of this **M²RP** Project, the team/group would have been guided to **identify an area of research** and mentored to stay focused on achieving greater heights and recognition in this area.
- By the end of this **M²RP** Project, **any possibility for carrying out collaborative projects between departments or institutions will be mentored.**

Requirement from the Group/Team

- Committed and Organised - **M²RP** team co-ordinator
- Directly coordinating with the Team Ignobilis - who will report the progress of the program.
- Monitoring enrolled faculties - Online training progress through the **M²RP** team co-ordinator.
- Reviewing the monthly report from the co-ordinator of Ignobilis Terrain LLP and addressing the concerns.
